Water remover

Ref. 1082B

12x300ml

USE

The accumulation of water in the fuel tank leads to the following problems:

- Corrosion,
- Bad combustion,
- Intermittent acceleration,
- Poor cold start,
- Decrease in performance.

BARDAHL Fuel water remover will overcome these problems.

Compatible with any type of petrol or diesel engines (injection, high pressure, turbo, LPG), catalytic converters and particle filters.

PROPERTIES

BARDAHL Fuel water remover :

- Eliminates water due to condensation in petrol and diesel fuel,
- Protects the fuel system (injectors, pump and carburettor) thanks to its lubricating properties,
- Assists cold start and protects the engine from corrosion,
- Prevents the formation of rust and deposits in the fuel system,
- Avoids injector and pump seizing on high pressure engine.

INSTRUCTIONS FOR USE

Before filling up, pour the contents of one can into the fuel tank. One can will treat up to 60 litres of fuel.

PHYSICAL & CHEMICAL PROPERTIES

Color	Slightly yellow
Physical state at 20°C	Liquid
Odour	Alcohol
